LEASE MANAGEMENT

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, within a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?"

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3lGde5k>

LEASE MANAGEMENT

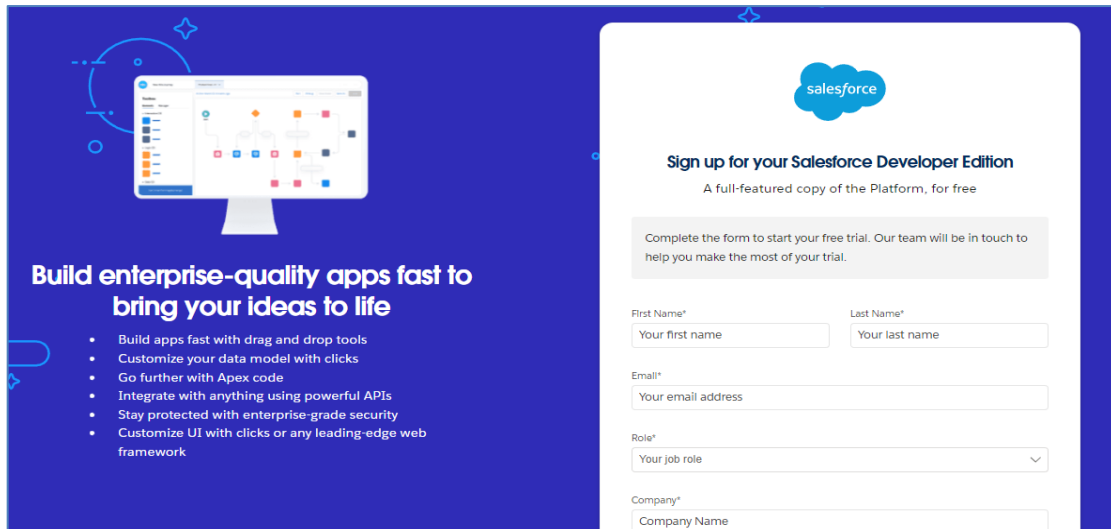

Milestone-1

Salesforce Account

Activity – 1 Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign-up form, enter the following details:

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

Activity 2: Account Activation:

Account Activation:

LEASE MANAGEMENT

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

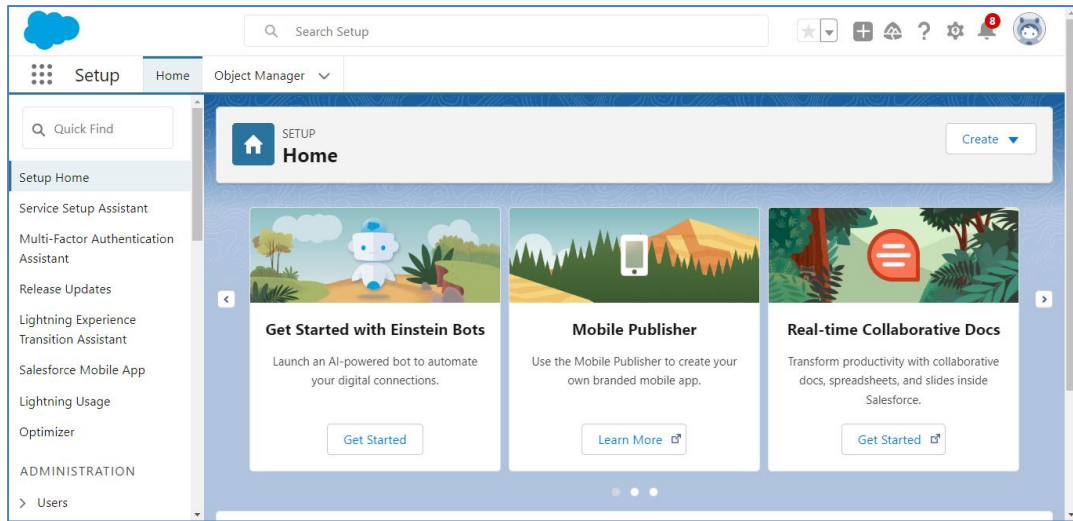

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of a "Change Your Password" form. At the top, it says "Change Your Password". Below that, it says "Enter a new password for lead@sb.com. Make sure to include at least:" followed by three requirements: "8 characters", "1 letter", and "1 number", each with a green checkmark. The form has four main sections: "New Password" with a text input field showing "Good", "Confirm New Password" with a text input field showing "Match", "Security Question" with a dropdown menu showing "In what city were you born?", and "Answer" with a text input field showing "asdfghjkl". A blue button labeled "Change Password" is at the bottom. A red rectangular box highlights the "New Password", "Confirm New Password", "Answer", and the "Change Password" button.

4. Then you will redirect to your salesforce setup page.

LEASE MANAGEMENT

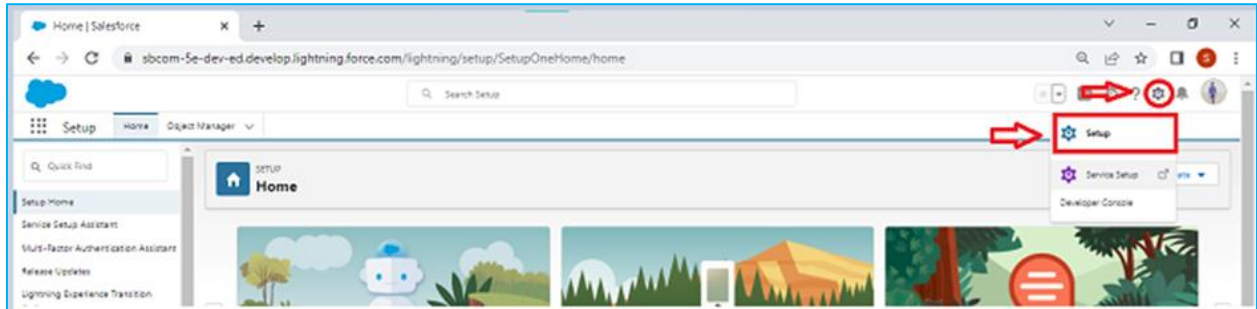

LEASE MANAGEMENT

Milestone-2

Object Creation

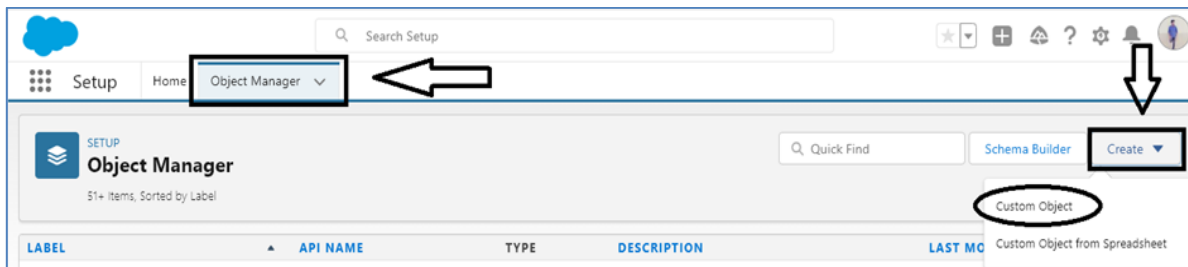

Activity – 1: Create Property Object:

To Navigate to Setup page:

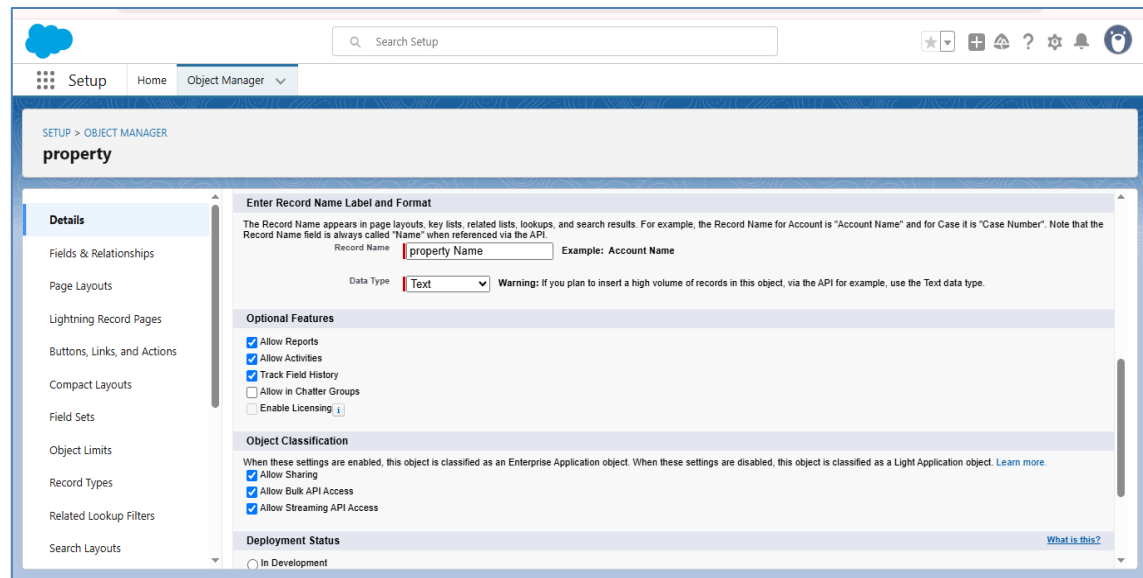

To create an object:

1. From the setup page? Click on Object Manager? Click on Create? Click on Custom Object.

2. Enter label name as property
3. Enter plural label name as property
4. Enter Record Name as property name
5. Select data type as Text
6. Select Allow reports, Track field history, Allow activities
8. Click on Save and New

LEASE MANAGEMENT

This screenshot shows the Salesforce Setup interface for the 'property' object. The left sidebar contains a 'Details' menu with options like Fields & Relationships, Page Layouts, and Lightning Record Pages. The main content area is titled 'Enter Record Name Label and Format' and includes a text input for 'Record Name' (set to 'property Name') and a 'Data Type' dropdown (set to 'Text'). Below this, there are sections for 'Optional Features' (with checkboxes for Allow Reports, Allow Activities, Track Field History, Allow in Chatter Groups, and Enable Licensing) and 'Object Classification' (with checkboxes for Allow Sharing, Allow Bulk API Access, and Allow Streaming API Access). The 'Deployment Status' section shows a radio button for 'In Development'.

Activity - 3 Create Payment Object:

From set up page

1. Click on Object Manager
2. Click on Create>>Click on Custom Object
3. Enter label name as Payment for tenant
4. Enter plural label name as Payment

The screenshot shows the Salesforce Object Manager interface for creating a custom object named "Payment for tenant". The page is titled "SETUP > OBJECT MANAGER" and "Payment for tenant". On the left, there is a sidebar with a "Details" section containing links for "Fields & Relationships", "Page Layouts", "Lightning Record Pages", "Buttons, Links, and Actions", "Compact Layouts", "Field Sets", "Object Limits", "Record Types", "Related Lookup Filters", and "Search Layouts". The main content area is titled "Custom Object Information" and includes a warning: "The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates." Below this, there are input fields for "Label" (set to "Payment for tenant", example: "Account"), "Plural Label" (set to "Payment", example: "Accounts"), and "Object Name" (set to "Payment_for_tenant", example: "Account"). There is also a checkbox for "Starts with vowel sound" which is unchecked. A "Description" field is present but empty. Under "Context-Sensitive Help Setting", the "Open the standard Salesforce.com Help & Training window" option is selected. The "Content Name" is set to "--None--". At the bottom, there is a section titled "Enter Record Name Label and Format" with a note: "The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is 'Account Name' and for Case it is 'Case Number'. Note that the".

5. Enter record name as Payment Name
6. Enter data type as Text
7. Click on Allow reports, Track field history, Allow activities

LEASE MANAGEMENT

The screenshot shows the Salesforce Setup interface for configuring the 'Payment for tenanat' object. The left sidebar contains a 'Details' menu with options: Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Enter Record Name Label and Format' and includes a text input for 'Record Name' with the value 'Payment Name' and an example 'Account Name'. Below this is a 'Data Type' dropdown set to 'Text' with a warning message. The 'Optional Features' section has checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Object Classification' section explains the difference between Enterprise and Light Application objects and includes checkboxes for 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access'. The 'Deployment Status' section has radio buttons for 'In Development' and 'Deployed'. A 'What is this?' link is visible at the bottom right of the main content area.

8. Click on Allow Search

9. Click on Save And New

This screenshot shows the same Salesforce Setup page as the previous one, but with the 'Search Status' section expanded. The 'Allow Search' checkbox is checked. The 'Deployment Status' section shows 'Deployed' as the selected option. At the bottom of the page, there are three buttons: 'Save', 'Save & New', and 'Cancel'.

Activity – 4 Create Lease Object:

LEASE MANAGEMENT

From set up page

1. Click on Object Manager
2. Click on Create>>Click on Custom Object
3. Enter label name as lease
4. Enter plural label name as lease

The screenshot shows the Salesforce Object Manager setup page for a custom object named "lease". The browser address bar shows the URL: `orgfarm-a3dff81ab5-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/01lgK000000rqOf/edit?address=%2F01lgK000000rqOf%2Fe%3FretURL%3D%252Fs...`. The page has a navigation bar with "Setup", "Home", and "Object Manager" tabs. A left sidebar lists various setup options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled "Custom Object Information" and includes the following fields and sections:

- Label:** "lease" (Example: Account)
- Plural Label:** "lease" (Example: Accounts)
- Starts with vowel sound:** ☐
- The Object Name is used when referencing the object via the API:** "lease" (Example: Account)
- Description:** A large text area.
- Context-Sensitive Help Setting:** ☒ Open the standard Salesforce.com Help & Training window, ☐ Open a window using a Visualforce page.
- Content Name:** A dropdown menu with "None" selected.
- Enter Record Name Label and Format:** A section with a warning: "The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is 'Account Name' and for Case it is 'Case Number'. Note that the Record Name field is always called 'Name' when referenced via the API." It includes a "Record Name" field with "lease Name" entered (Example: Account Name) and a "Data Type" dropdown set to "Text". A warning message states: "Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type."

5. Enter record name as lease Name
6. Enter data type as Text
7. Click on Allow reports, Track field history, Allow activities

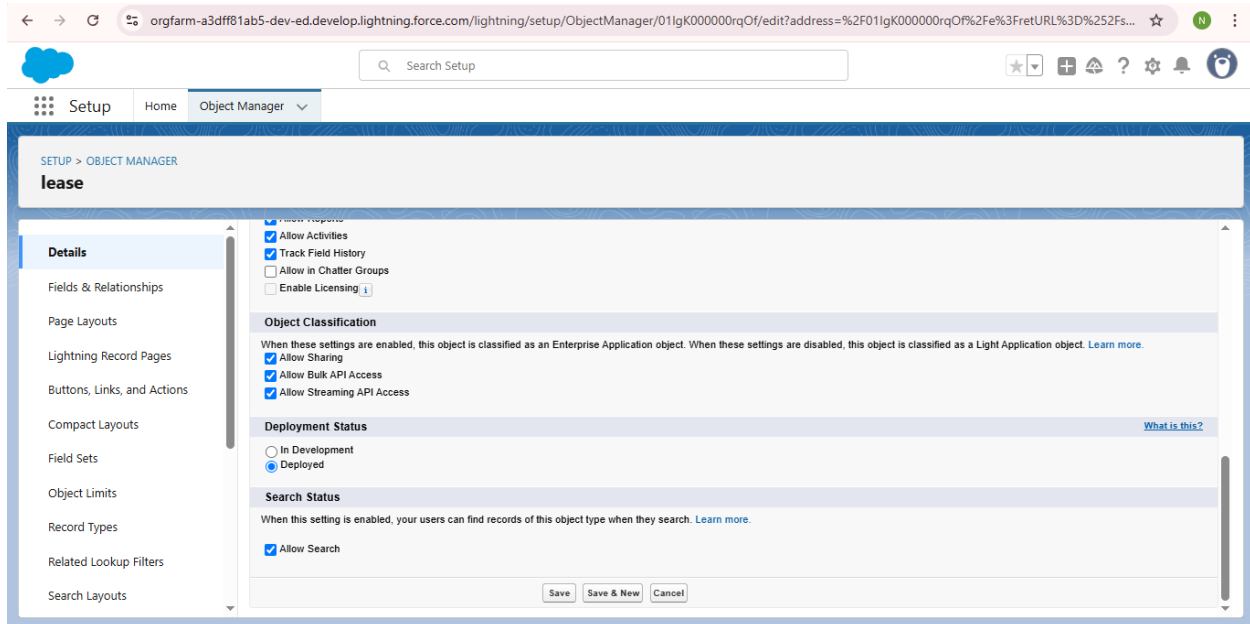

The screenshot shows the Salesforce Object Manager setup page for a custom object named "lease", specifically the "Optional Features" and "Object Classification" sections. The browser address bar shows the URL: `orgfarm-a3dff81ab5-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/01lgK000000rqOf/edit?address=%2F01lgK000000rqOf%2Fe%3FretURL%3D%252Fs...`. The page has a navigation bar with "Setup", "Home", and "Object Manager" tabs. A left sidebar lists various setup options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled "Enter Record Name Label and Format" and includes the following sections:

- Optional Features:** A section with checkboxes for "Allow Reports", "Allow Activities", "Track Field History", "Allow in Chatter Groups", and "Enable Licensing". The "Allow Reports", "Allow Activities", and "Track Field History" checkboxes are checked.
- Object Classification:** A section with a warning: "When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)" It includes checkboxes for "Allow Sharing", "Allow Bulk API Access", and "Allow Streaming API Access". The "Allow Sharing", "Allow Bulk API Access", and "Allow Streaming API Access" checkboxes are checked.
- Deployment Status:** A section with a radio button for "In Development".

From set up page

1. Search for Tabs in the Quick find box
2. Click on tabs
3. Click on New under custom object tab
4. Select object Payment for tenant>>Select the tab style

LEASE MANAGEMENT

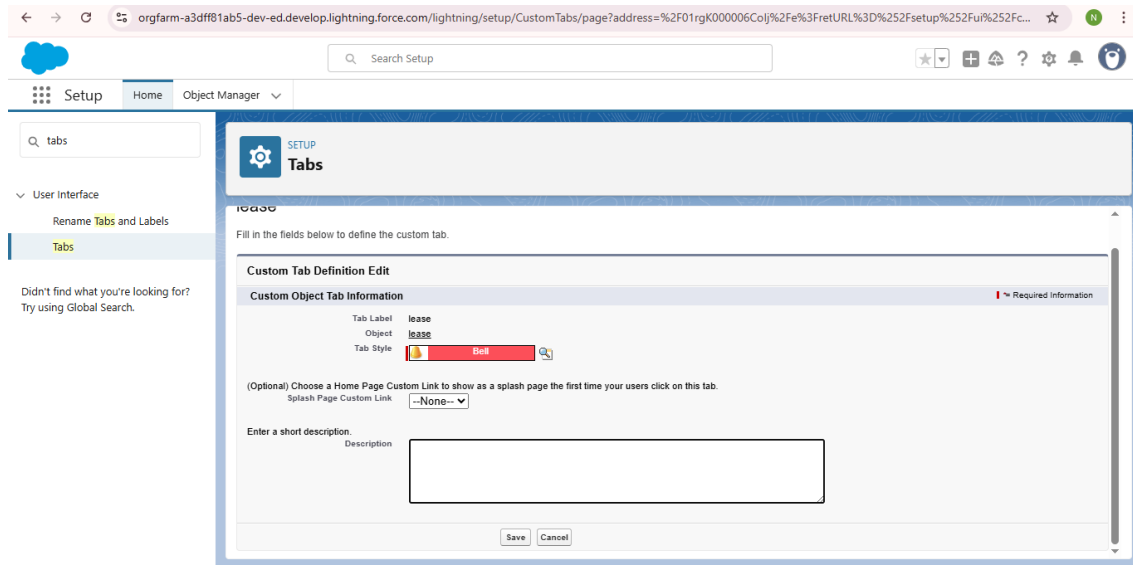

5. Click on next>> (Add to profile page) keep it as default>>Click on Next (Add to custom app)
Uncheck the include tab.
6. Make sure that the Append to tab user's existing personal customizations is checked
7. Click on Save

Activity – 4 To create a Tab:(lease)

From set up page

1. Search for Tabs in the Quick find box
2. Click on tabs
3. Click on New under custom object tab
4. Select object lease>>Select the tab style

LEASE MANAGEMENT

5. Click on next>> (Add to profile page) keep it as default>>Click on Next (Add to custom app)
Uncheck the include tab.
6. Make sure that the Append to tab user's existing personal customizations is checked
7. Click on Save

Milestone – 4

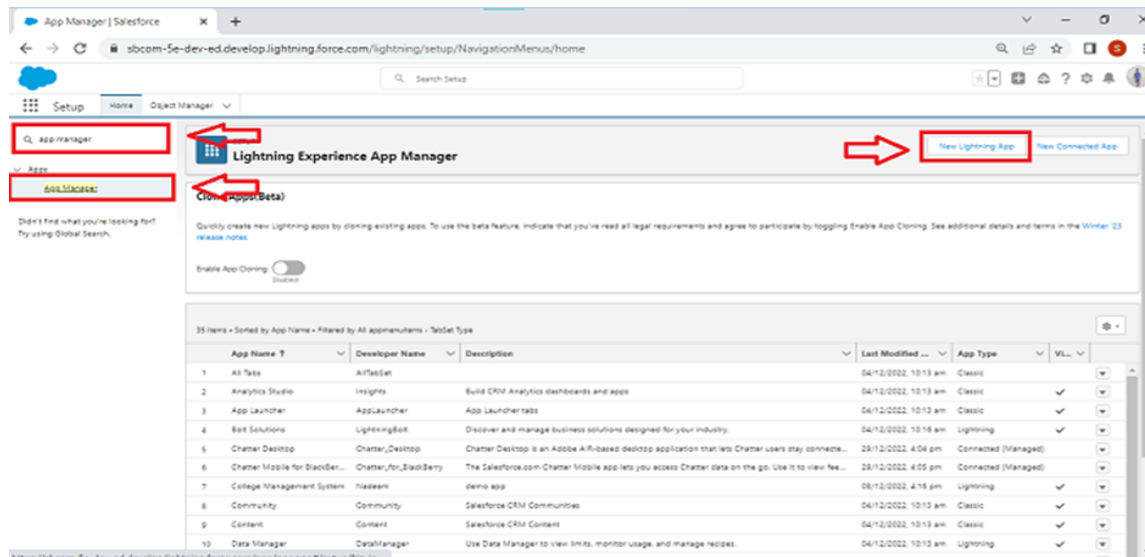

The Lightning App

Activity – 1 To create a lightning app page:

From the set up

1. Search App Manager in the Quick find box>>Select App Manager>>Click on New Lightning App

LEASE MANAGEMENT

2. Fill the app name in app details and branding as follow

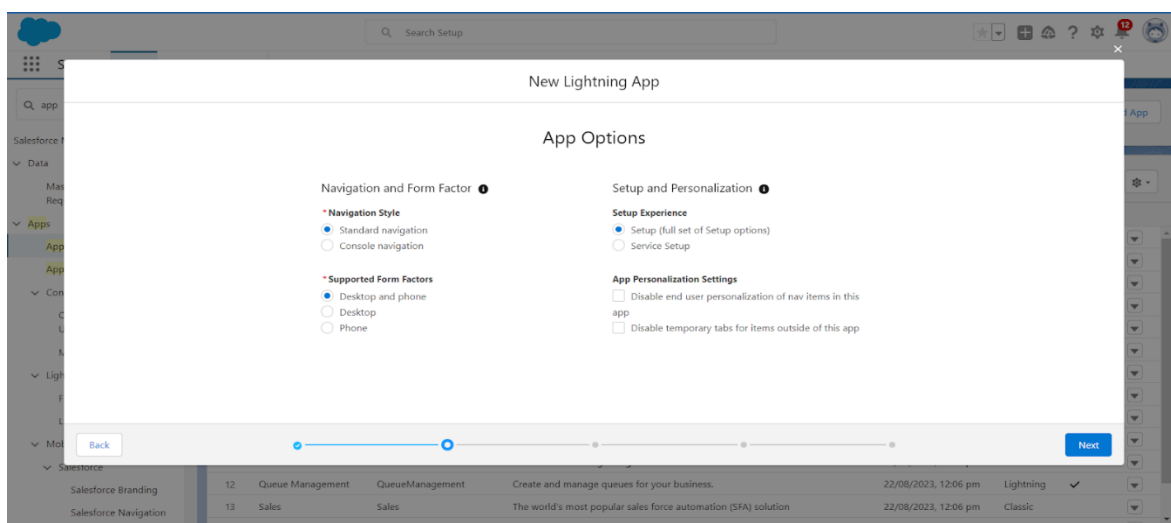

App Name: Lease Management

Developer Name: This will auto populated

Image: optional (if you want to give any image you can otherwise not (mandatory) Primary colour hex value: keep this default.

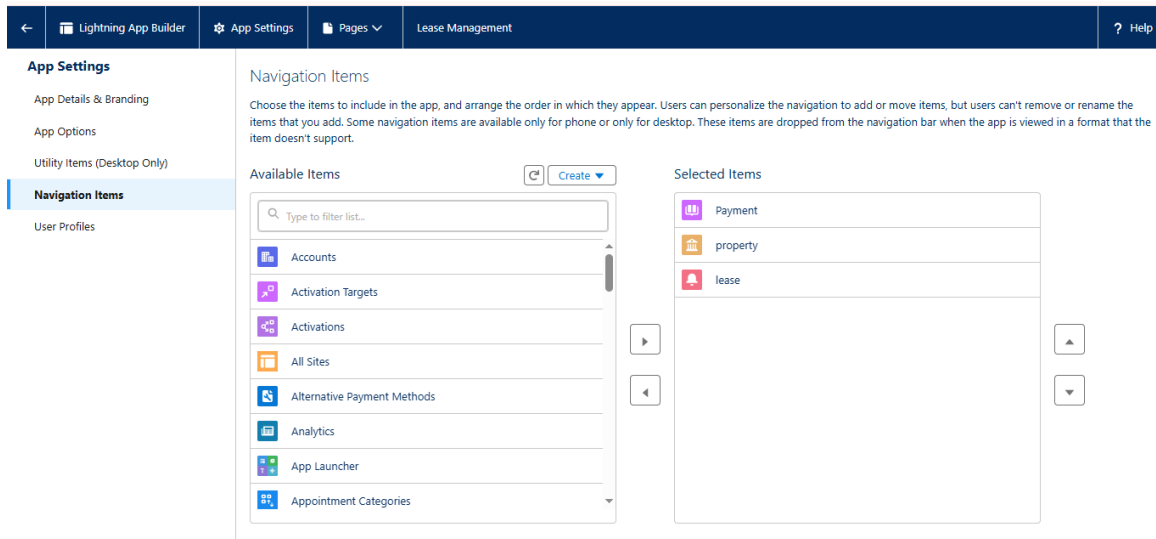

3. Then click Next >> (App option page) Set Navigation Style as Standard Navigation >> Next.

(Utility Items) keep it as default >> Next.

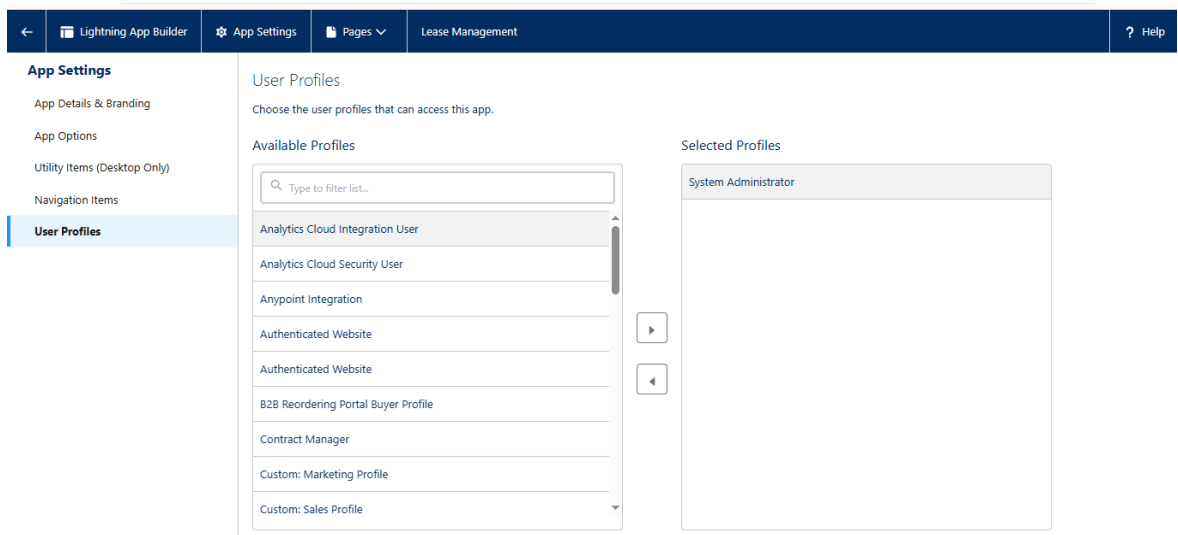

LEASE MANAGEMENT

4. To Add Navigation Items:

Search for the item in the (Payment for tenant, Tenants, property, lease) from the search bar and move it using the arrow button? Next? Next.

5. To Add User Profiles:

Search profiles (System administrator) in the search bar >>click on the arrow button >> save & finish.

LEASE MANAGEMENT

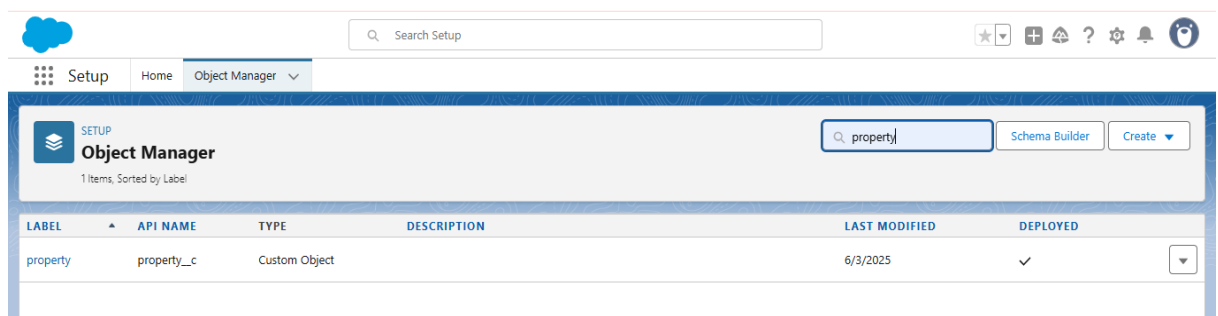

Milestone – 5

Fields

Activity – 1 To create fields in an object:

From set up

1. Click on Object Manager>>type Object name (property)in search bar>>Click on the object

LEASE MANAGEMENT

2. Click on Fields and Relationships>>New

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The 'Object Manager' dropdown is expanded, showing 'property' as the selected object. The left sidebar contains a list of setup options: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Fields & Relationships' and shows a list of 8 items, sorted by Field Label. The list includes fields like Address, Created By, Last Modified By, Name, Owner, property Name, sqft, and Type, each with its field name, data type, and whether it is indexed. A 'Quick Find' search bar is at the top right of the list, and buttons for 'New', 'Deleted Fields', 'Field Dependencies', and 'Set History Tracking' are also visible.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Address	Address_c	Long Text Area(32768)		
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Name	Name_c	Text(20)		
Owner	OwnerId	Lookup(User,Group)		✓
property Name	Name	Text(80)		✓
sqft	sqft_c	Text(18)		
Type	Type_c	Picklist		

3. Select data type as Text

The screenshot shows the Salesforce Setup interface with the 'Fields & Relationships' section selected. The left sidebar is the same as in the previous screenshot. The main content area displays a list of data types for a new field. The 'Text' option is selected, and its description is shown on the right. The list of data types includes Date, Date/Time, Email, Geolocation, Number, Percent, Phone, Picklist, Picklist (Multi-Select), Text (selected), Text Area, Text Area (Long), Text Area (Rich), Text (Encrypted), and Time. Each data type has a corresponding description of its functionality.

- ☐ Date: Allows users to enter a date or pick a date from a popup calendar.
- ☐ Date/Time: Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- ☐ Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- ☐ Geolocation: Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
- ☐ Number: Allows users to enter any number. Leading zeros are removed.
- ☐ Percent: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- ☐ Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- ☐ Picklist: Allows users to select a value from a list you define.
- ☐ Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- ☒ Text: Allows users to enter any combination of letters and numbers.
- ☐ Text Area: Allows users to enter up to 255 characters on separate lines.
- ☐ Text Area (Long): Allows users to enter up to 131,072 characters on separate lines.
- ☐ Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- ☐ Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- ☐ Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50.600" are all valid times for this field.

4. Click on next

Approval Process

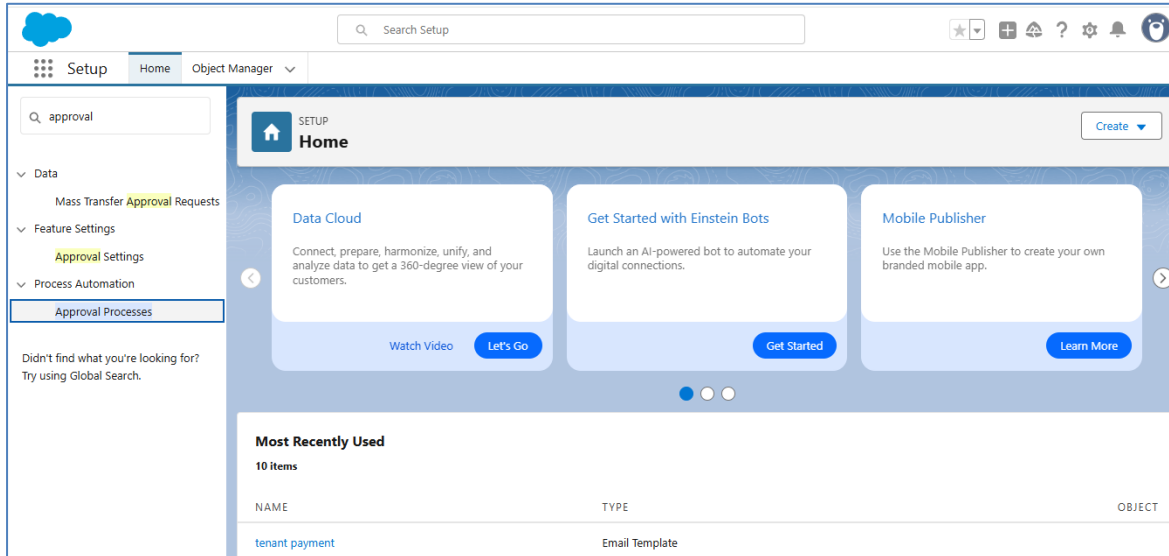

LEASE MANAGEMENT

Activity – 1 Create Approval Process for check for vacant:

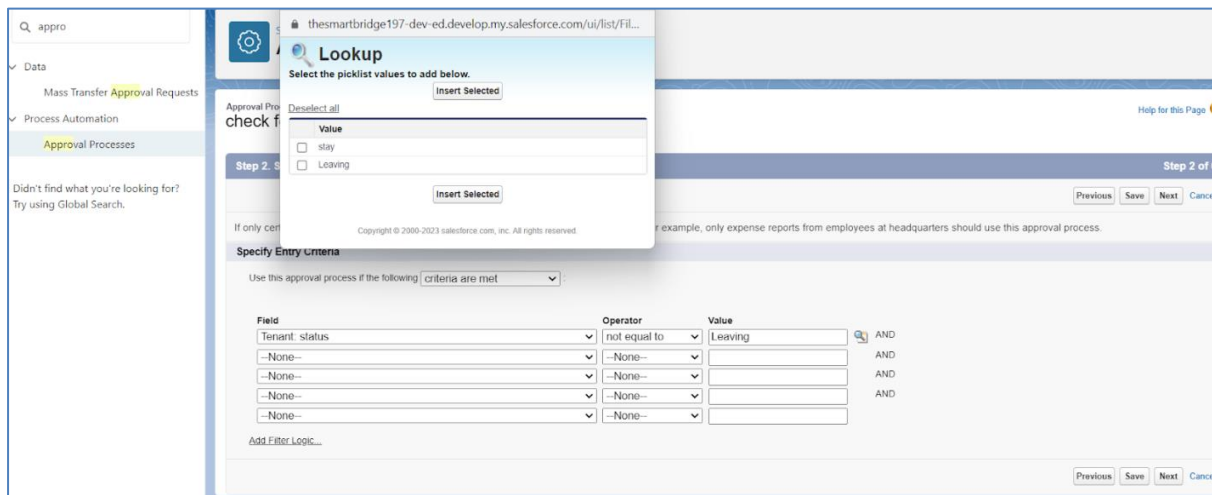

To create fields in an object

From the set up

1. In the quick find box >>Search for Approval process>>Click on it

2. Manage approval process for “Tenant” from the drop down
3. Click on “create new approval process”>>use standard set up wizard
4. Process name “check for vacant”>>Click on next
5. Field >>tenant: status>>Operator: Not equals>>value>>Click on the look up filter icon and select “Leaving”
6. Click on insert field, click on next

LEASE MANAGEMENT

7. Next Automated Approver determined by “None” from the drop down.
8. Select the “Administrators ONLY can edit records during the approval process”.
9. Then click Next.

The screenshot shows the 'Approval Processes' setup page in Salesforce. The page title is 'Approval Processes' with a 'SETUP' icon. Below the title, it says 'Approval Process Edit' and 'check for vacant'. The page is at 'Step 3 of 6: Specify Approver Field and Record Editability Properties'. There are 'Previous', 'Save', 'Next', and 'Cancel' buttons at the top right. A help icon is also present. The main content area has a text block explaining that approval requests can be routed to different users. Below this, there is a section 'Select Field Used for Automated Approval Routing' with a dropdown menu set to '--None--' and a checkbox for 'Use Approver Field of property Owner' which is unchecked. Another section, 'Record Editability Properties', has two radio button options: 'Administrators ONLY can edit records during the approval process.' (which is selected) and 'Administrators OR the currently assigned approver can edit records during the approval process.' At the bottom right, there are 'Previous', 'Save', 'Next', and 'Cancel' buttons.

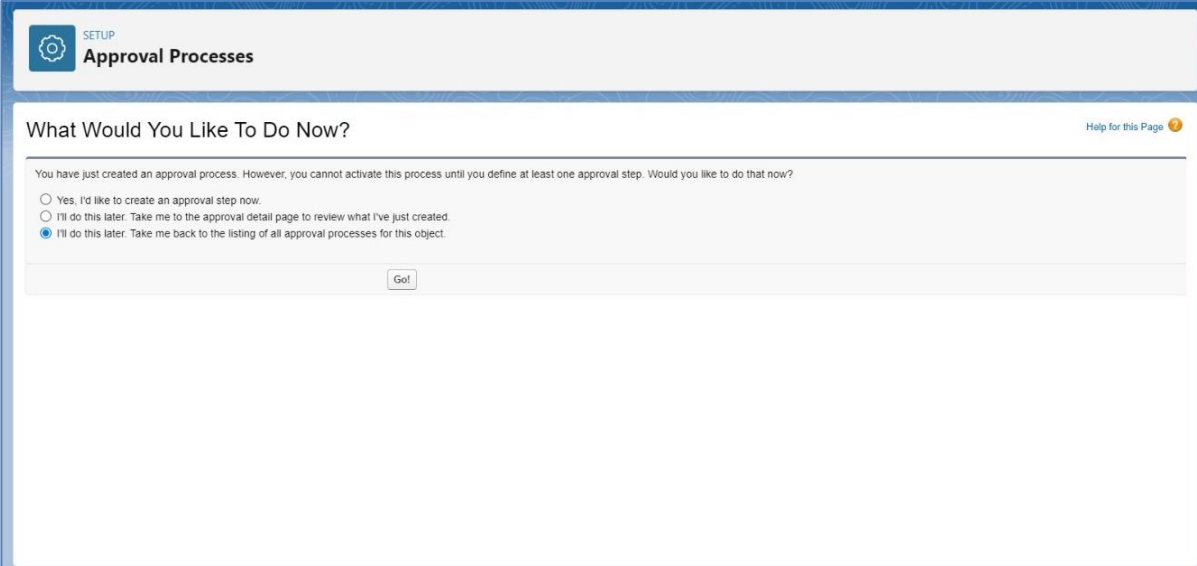

10. From the available fields select >> Tenant Name, and then add >>Add it to the selected.
- Then Next

Make sure Display approver history is checked.

And under security settings check the “Allow approvers to access the approval page only from within the Salesforce application. (Recommended)” option.

11. Submitter type Search>>Owner, Allowed Submitters>>Property Owner. Then Next.
12. Then click save.

LEASE MANAGEMENT

The screenshot shows a web interface for 'Approval Processes'. At the top, there is a header bar with a gear icon and the text 'SETUP Approval Processes'. Below this, a section titled 'What Would You Like To Do Now?' contains a message: 'You have just created an approval process. However, you cannot activate this process until you define at least one approval step. Would you like to do that now?'. Three radio button options are listed: 'Yes, I'd like to create an approval step now.', 'I'll do this later. Take me to the approval detail page to review what I've just created.', and 'I'll do this later. Take me back to the listing of all approval processes for this object.' The third option is selected. A 'Go!' button is located at the bottom of the options list. A 'Help for this Page' link with a question mark icon is in the top right corner of the section.

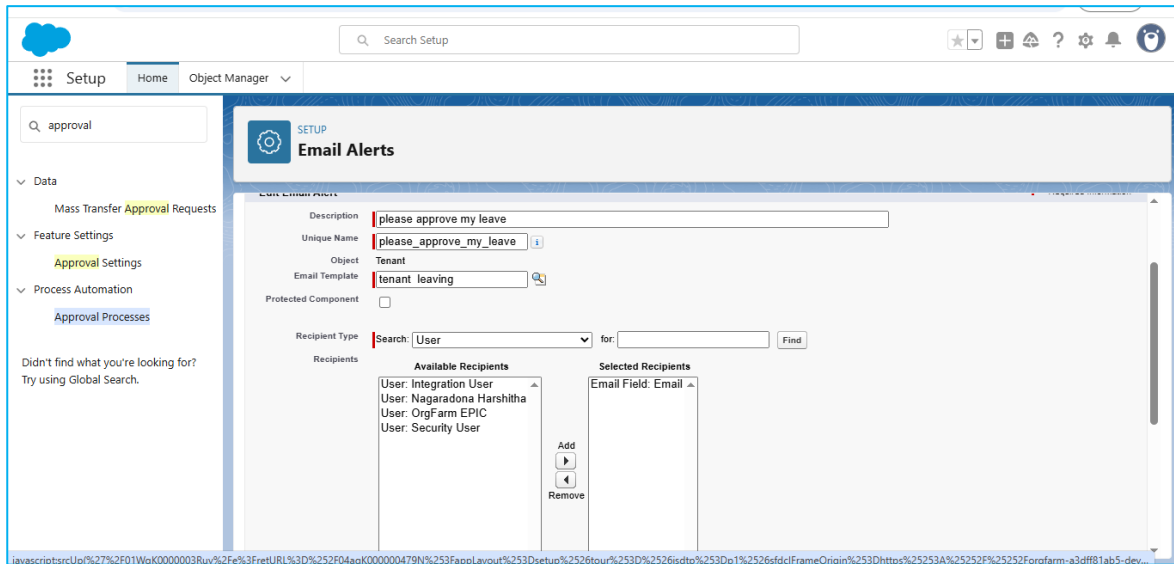

- Click on “I’ll do this later. Take me back to the listing of all approval process for this object
- Click go

4. Now write the code logic here

LEASE MANAGEMENT

Trigger Code:

```
trigger test on Tenant__c (before insert)  
{  
    if (trigger. is Insert && trigger.isBefore){  
        testHandler.preventInsert(trigger.new);  
    }  
}
```

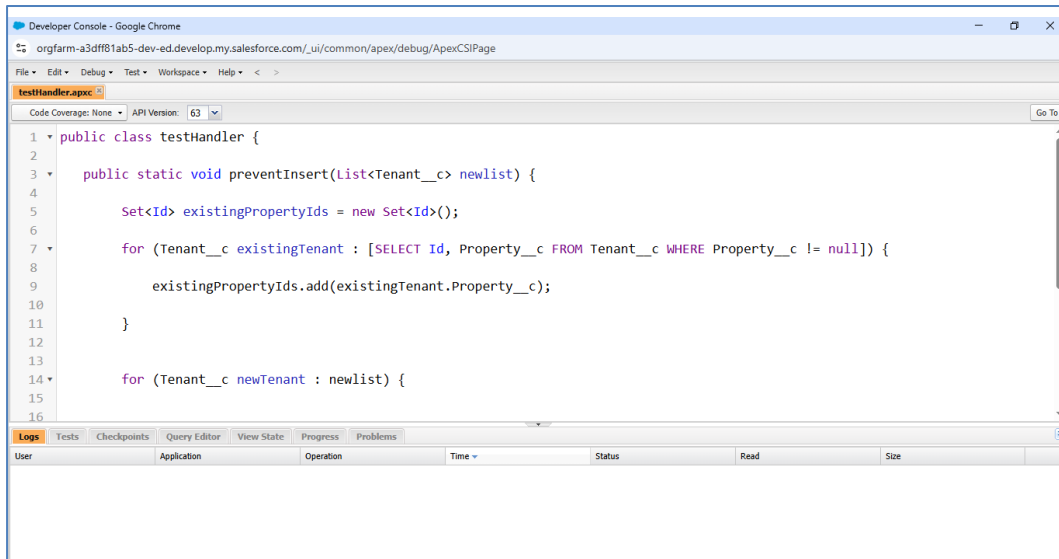

5.Click on Save

Create an Apex Handler class:

To create a new Apex class follow the below steps

1. Click on file>>New>> Apex class
2. Enter the trigger name as testHandler

LEASE MANAGEMENT

Apex logic:

```
public class testHandler {  
    public static void preventInsert(List<Tenant__c> newList) {  
        Set<Id> existingPropertyIds = new Set<Id>();  
        for (Tenant__c existingTenant : [SELECT Id, Property__c FROM Tenant__c WHERE  
Property__c != null]) {  
            existingPropertyIds.add(existingTenant.Property__c);  
        }  
        for (Tenant__c newTenant : newList) {  
            if (newTenant.Property__c != null &&  
existingPropertyIds.contains(newTenant.Property__c)) {  
                newTenant.addError('A tenant can have only one property');  
            }  
        }  
    }  
}
```

3. Click on Save

Activity – 3 Testing the Trigger:

Go to AppLauncher search for Lease Management>>Select Tenant>>

LEASE MANAGEMENT

Try to create new tenant with the existing property

1. Go to AppLauncher search for Lease Management>>Select Tenant>>Click on New
2. Enter the details of User

The screenshot shows a web application interface for 'Lease Management'. A modal window titled 'Edit Madhu' is open, allowing the user to edit tenant details. The form includes the following fields:

- Tenant Name:** Madhu
- Email:** madhu@gmail.com
- Phone:** 6281292720
- status:** Stay (dropdown menu)
- property:** House - 2 (dropdown menu)
- Owner:** Nagaradona Harshitha

At the bottom of the modal, there are three buttons: 'Cancel', 'Save & New', and 'Save'. The background shows the 'Lease Management' sidebar with a 'Details' tab selected, displaying the tenant's information. The main content area shows a list of related tenants, including 'Madhu'.

3. Select property as House-2
4. Click on Save

Milestone – 10

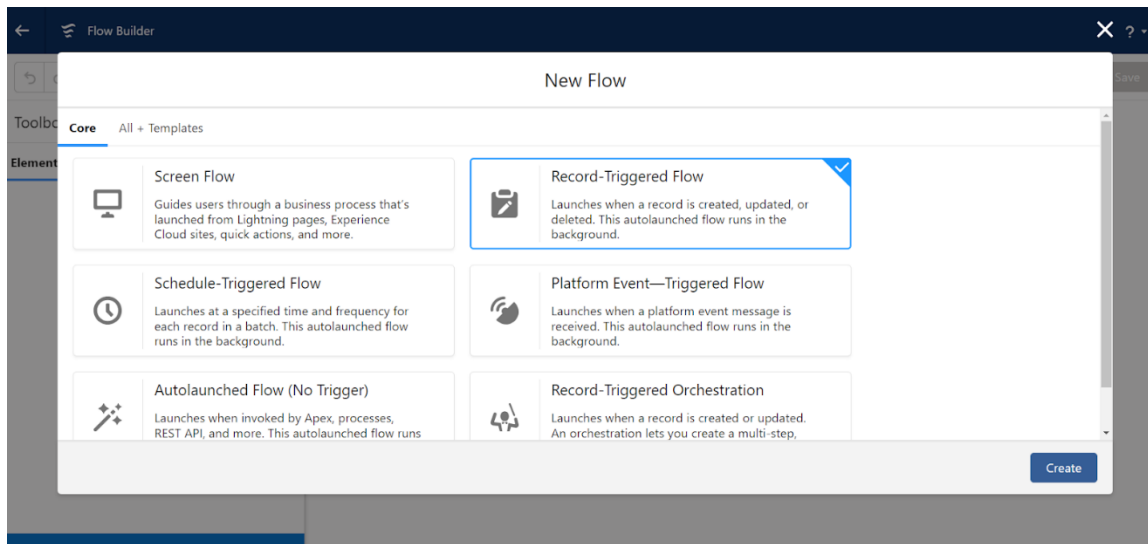

Flows

Activity – 1 Create Flow for monthly payment

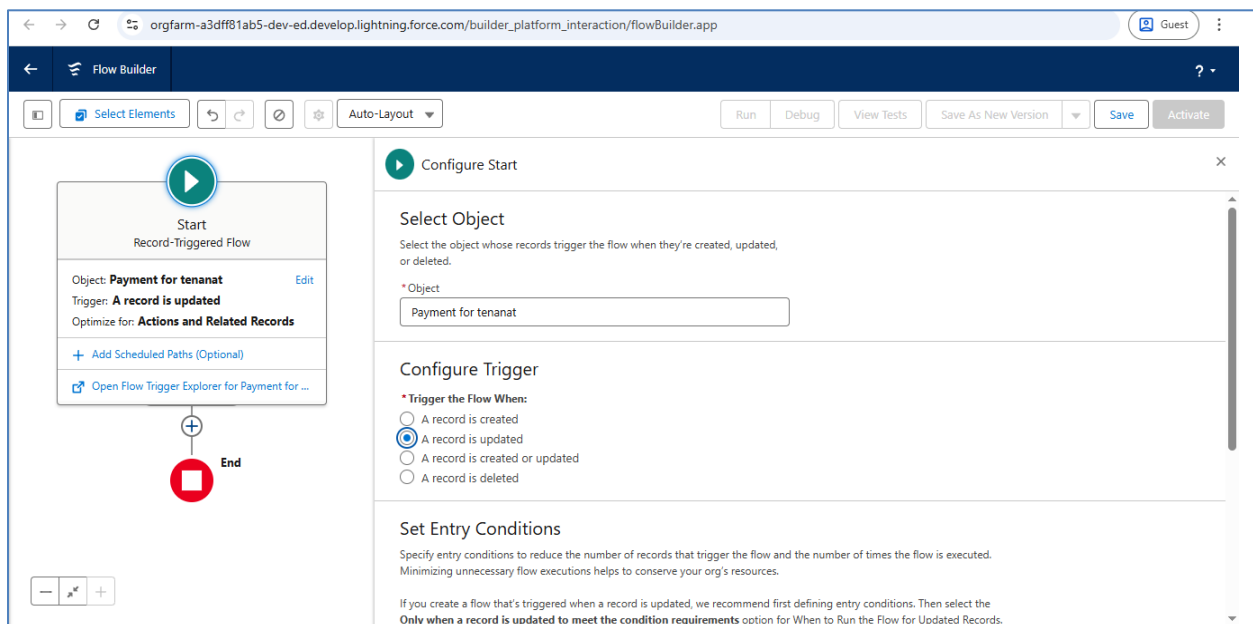

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.

LEASE MANAGEMENT

2. Select the record Triggered flow. Click on create.

3. Under Object select "Payment for tenant". Click on A record is updated.

Set Entry Conditions

Under Condition Requirements

All Conditions are met

Field: check_for_payment__c operator: Equals value: Paid

LEASE MANAGEMENT

5. Click on: Every time a record is updated and meets the condition requirements
6. Click on: Actions and related records, done

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

All Conditions Are Met (AND)

Field	Operator	Value
check_for_paymet_c	Equals	paid

+ Add Condition

When to Run the Flow for Updated Records

☒ Every time a record is updated and meets the condition requirements

☐ Only when a record is updated to meet the condition requirements

*** Optimize the Flow for:**

Fast Field Updates

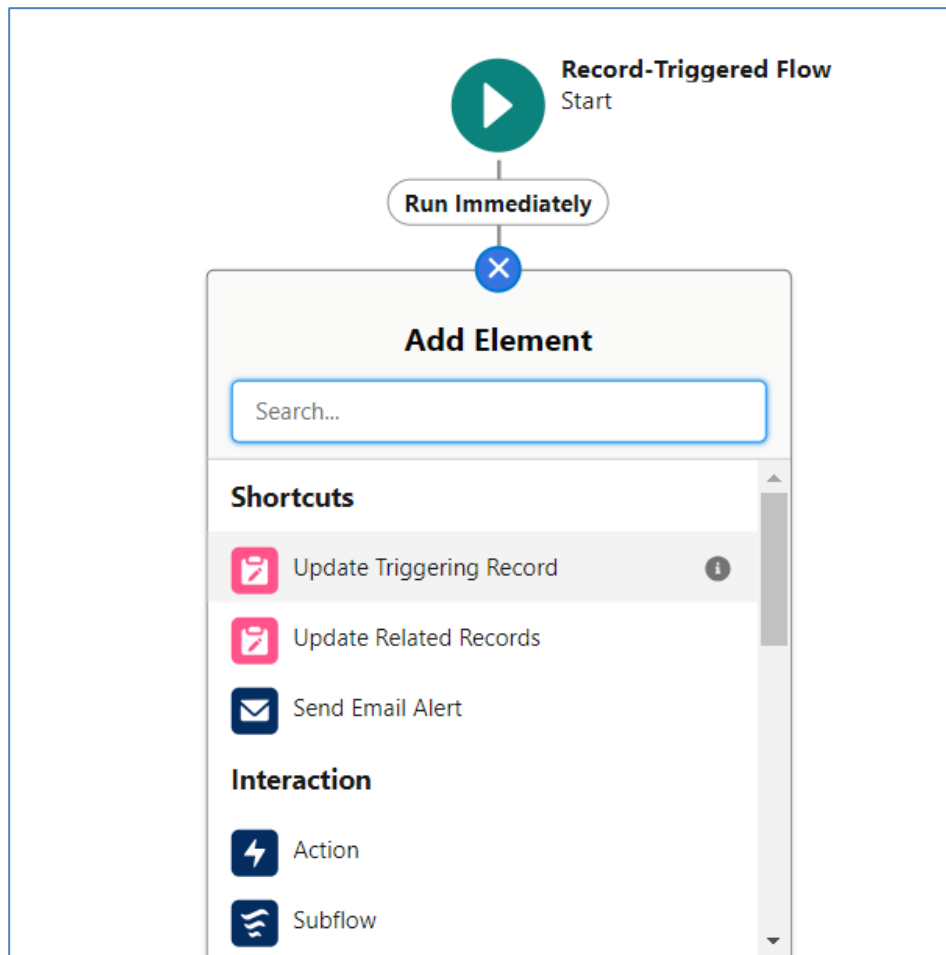

Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

Actions and Related Records

Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

Under record trigger flow click on “+” icon and select action

LEASE MANAGEMENT

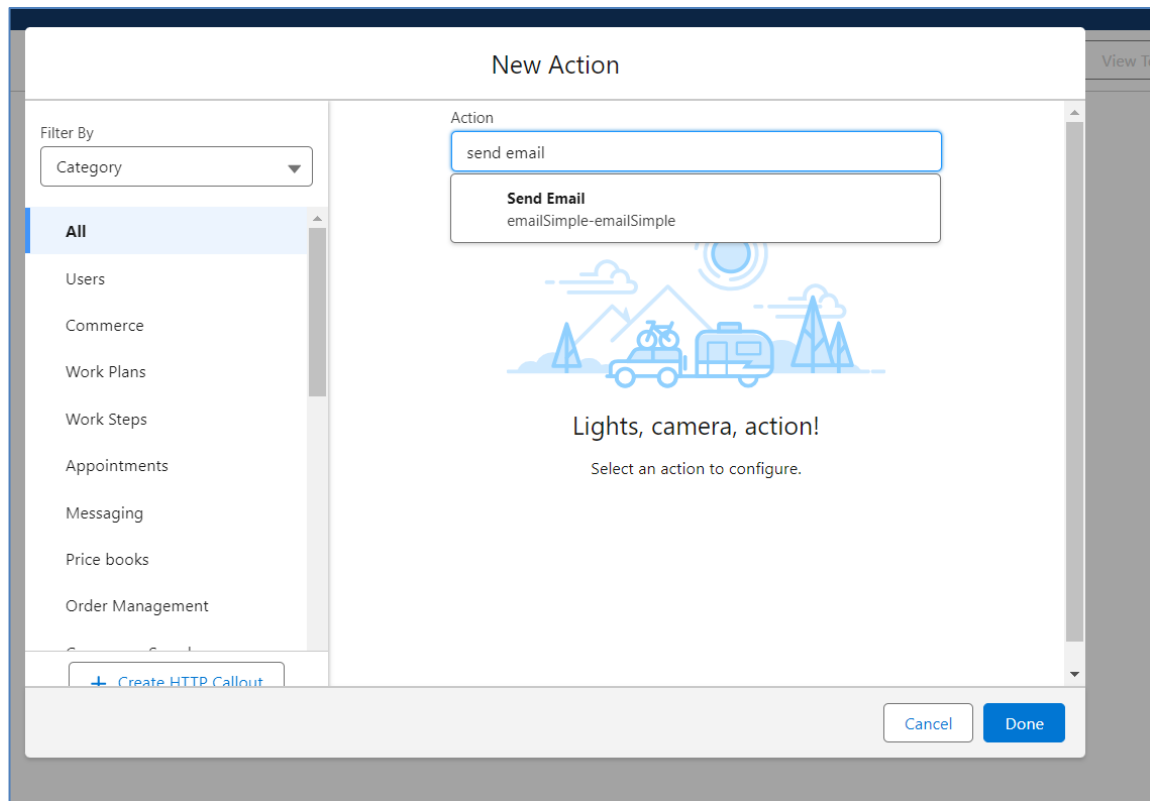

7. In action search for send email then click on send email (check below image)

8. Label: send email

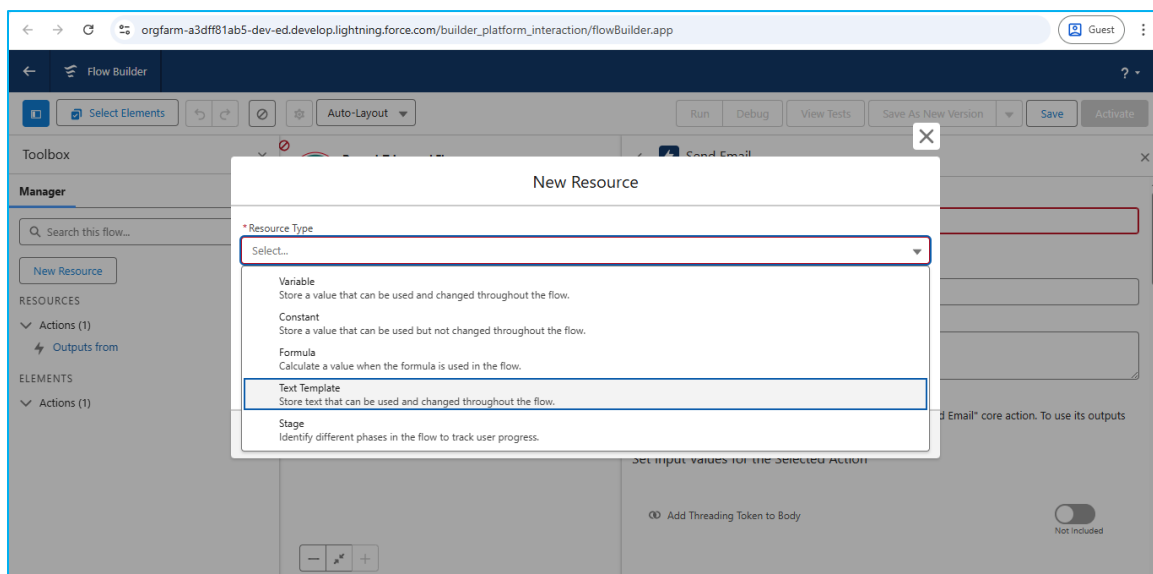

9.API Name: send email

LEASE MANAGEMENT

10. Enable Body

11. Click on new resource

LEASE MANAGEMENT

Under resource type select “Text Template”

API Name : emailbody

Under body:(paste the below text)

Dear {! \$Record.Tenant__r. Name},

We hope this email finds you well. We are writing to inform you that we have successfully received your monthly payment. Thank you for your prompt and diligent payment.

12. Click Done.

13. Enable recipient Address List

Paste this? {! \$Record.Tenant__r. Email__c}

14. Click Done

15. Enable subject

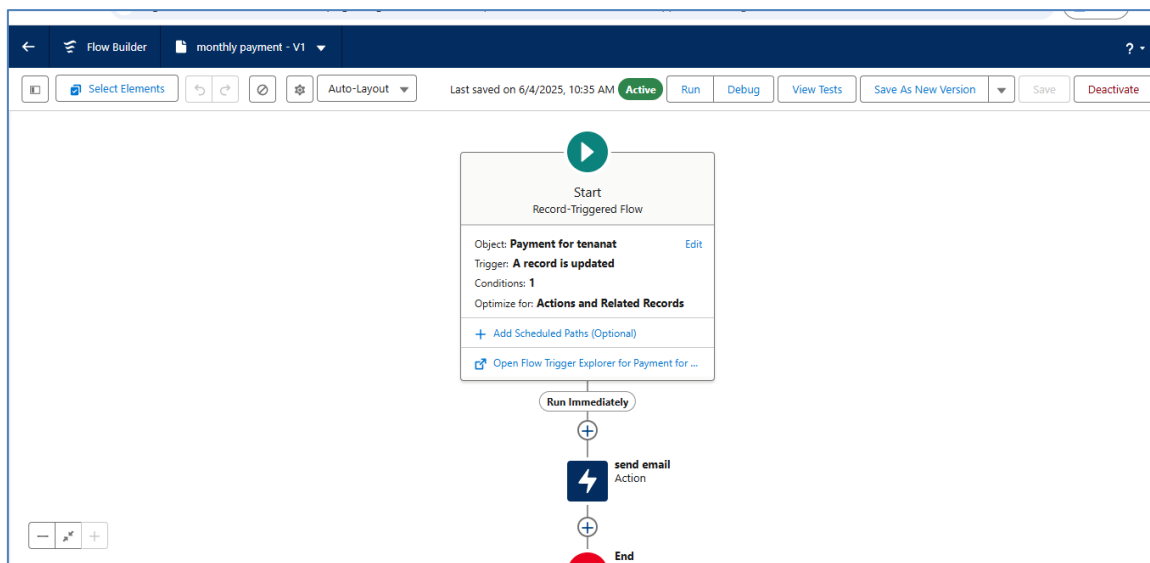

Paste this >> Confirmation of Successful Monthly Payment

16. Click on save

Flow label: monthly payment

Flow API Name: monthly payment

Click on activate

Milestone – 11

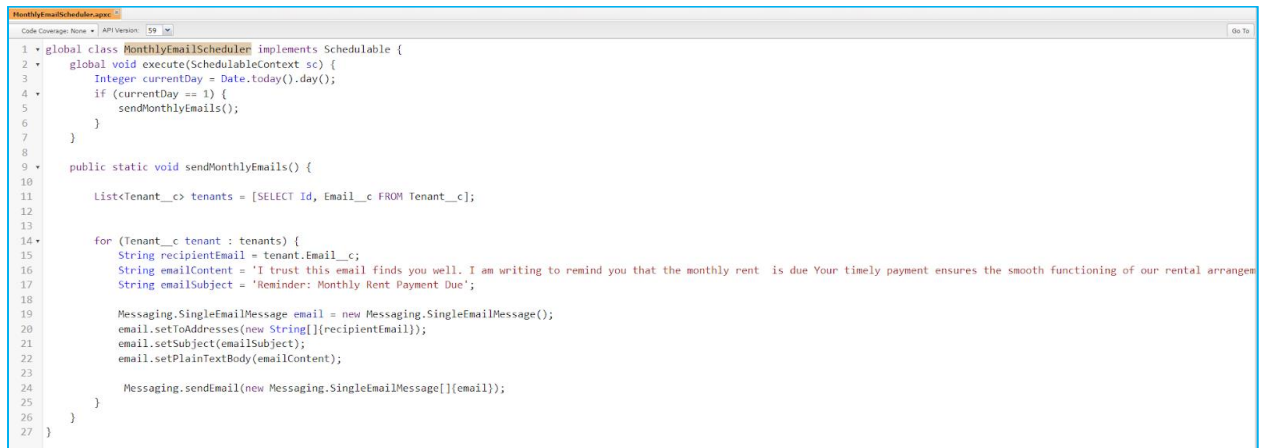

Schedule class

Create an Apex Class

LEASE MANAGEMENT

To create a new Apex Class, follow the below steps:

1. Click on the file >> New >> Apex Class.
2. Enter class name as MonthlyEmailScheduler.

A screenshot of the Apex IDE showing the MonthlyEmailScheduler class. The code is as follows:

```
1 global class MonthlyEmailScheduler implements Schedulable {
2     global void execute(SchedulableContext sc) {
3         Integer currentDay = Date.today().day();
4         if (currentDay == 1) {
5             sendMonthlyEmails();
6         }
7     }
8
9     public static void sendMonthlyEmails() {
10         List<Tenant__c> tenants = [SELECT Id, Email__c FROM Tenant__c];
11
12         for (Tenant__c tenant : tenants) {
13             String recipientEmail = tenant.Email__c;
14             String emailContent = 'I trust this email finds you well. I am writing to remind you that the monthly rent is due Your timely payment ensures the smooth functioning of our rental arrangement and helps maintain a positive living environment for all.';
15             String emailSubject = 'Reminder: Monthly Rent Payment Due';
16
17             Messaging.SingleEmailMessage email = new Messaging.SingleEmailMessage();
18             email.setToAddresses(new String[]{recipientEmail});
19             email.setSubject(emailSubject);
20             email.setPlainTextBody(emailContent);
21
22             Messaging.sendEmail(new Messaging.SingleEmailMessage[]{email});
23         }
24     }
25 }
26
27 }
```

Apex logic:

global class MonthlyEmailScheduler implements Schedulable {

global void execute(SchedulableContext sc) {

Integer currentDay = Date.today().day();

if (currentDay == 1) {

sendMonthlyEmails();

}

}

public static void sendMonthlyEmails() {

List<Tenant__c> tenants = [SELECT Id, Email__c FROM Tenant__c];

for (Tenant__c tenant : tenants) {

String recipientEmail = tenant.Email__c;

String emailContent = 'I trust this email finds you well. I am writing to remind you that the monthly rent is due Your timely payment ensures the smooth functioning of our rental arrangement and helps maintain a positive living environment for all.';

String emailSubject = 'Reminder: Monthly Rent Payment Due';

Messaging.SingleEmailMessage email = new Messaging.SingleEmailMessage();

email.setToAddresses(new String[]{recipientEmail});

email.setSubject(emailSubject);

LEASE MANAGEMENT

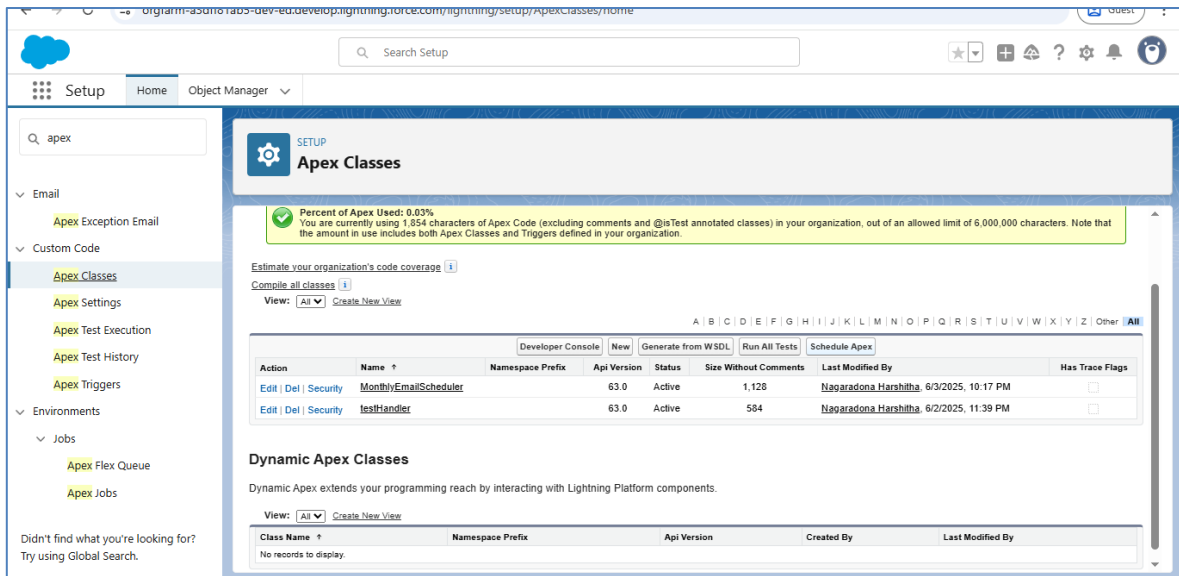

```
email.setPlainTextBody(emailContent);  
Messaging.sendEmail(new Messaging.SingleEmailMessage[]{email});  
}  
}  
}
```

3. Save the code

Activity – 2 Schedule Apex class:

1. Enter Apex class in quick find box
2. Select schedule Apex

LEASE MANAGEMENT

3. Enter job Name: MonthlyEmailScheduler
4. Apex class: MonthlyEmailScheduler
5. Frequency: Monthly==>select on day 1
6. Start date: 04/12/2023
7. End date: 04/01/2024
8. Preferred start time: 09:00 am
9. save

Schedule Apex

Schedule an Apex class that implements the 'Schedulable' interface to be automatically executed on a weekly or monthly interval.

LEASE MANAGEMENT

From the set up

- 1.Go to ObjectManager>>Select tenant>>Click on page layouts
- 2.Go to the buttons tab
- 3.Drag submit for approval towards the tenant detail

LEASE MANAGEMENT

1.Go to AppLauncher>>Search Lease Management>>Select Tenant

LEASE MANAGEMENT

2. Click on the user created

The screenshot displays a Salesforce Lightning interface for 'Tenant Management'. The main content area shows a tenant profile for 'Madhu' with the following details:

- Tenant Name:** Madhu
- Email:** madhu@gmail.com
- Phone:** 6281292720
- status:** Stay
- property:** House - 2
- Owner:** Nagaradona Harshitha
- Created By:** Nagaradona Harchitha, 6/3/2025, 12:18 AM
- Last Modified By:** Nagaradona Harchitha, 6/3/2025, 11:35 PM

A dropdown menu is open on the right side of the tenant profile, showing the following options:

- New Case
- New Lead
- Delete
- Clone
- Change Owner
- Printable View
- Submit for Approval
- Submit for Approval

The interface also includes a search bar at the top, a navigation menu on the left, and a task bar at the bottom.

The screenshot displays the 'Lease Management' application interface. The main content area shows a 'Process Instance Step' titled 'Tenant Approval' with a status of 'Approved'. Below this, a table lists the submission details:

Submitter	Date Submitted	Actual Approver	Assigned To
Nagaradona Harshitha	Jun 6, 2025	Nagaradona Harshitha	Nagaradona Harshitha

Below the table, there is a 'Details' section with a sub-section 'Approval Details'. It shows the 'Tenant Name' as 'Madhu'.

On the right side, there is a 'Notifications' sidebar. It contains three notifications:

- Approval request for the tenant is approved** (Madhu) - a few seconds ago
- Approval request for the tenant is rejected** (Madhu) - Jun 5, 2025, 10:46 AM
- New Guidance Center learning resource available** (Set Up Accounts & Contacts) - Jun 3, 2025, 9:30 AM

The bottom of the page shows a 'javascript:void(0)' link.

LEASE MANAGEMENT

Lease tab:

The screenshot shows the 'New lease' form in the Lease Management app. The form is titled 'New lease' and has a close button (X) in the top right corner. It contains several input fields: 'lease Name' (required, with a red asterisk), 'start date', 'End date', and 'property'. The 'lease Name' field is filled with 'HOUSE 1'. The 'start date' is '6/18/2025' and the 'End date' is '7/18/2025'. The 'property' field is a dropdown menu showing 'House - 1'. To the right of the form, the 'Owner' is listed as 'Nagaradona Harshitha'. At the bottom of the form are three buttons: 'Cancel', 'Save & New', and 'Save'. The background shows the 'Lease Management' app interface with a search bar and navigation tabs for 'property', 'Payment', 'lease', and 'Tenants'. The 'lease' tab is selected. Below the form, there is a message: 'Nothing to see here. There's nothing in your list yet. Try adding a new record.'

Tenants tab:

The screenshot shows the 'Edit Madhu' form in the Tenants tab of the Lease Management app. The form is titled 'Edit Madhu' and has a close button (X) in the top right corner. It contains several input fields: 'Tenant Name' (required, with a red asterisk), 'Email' (required, with a red asterisk), 'Phone', 'status', and 'property'. The 'Tenant Name' field is filled with 'Madhu'. The 'Email' field is filled with 'madhu@gmail.com'. The 'Phone' field is filled with '6281292720'. The 'status' field is a dropdown menu showing 'Stay'. The 'property' field is a dropdown menu showing 'House -2'. To the right of the form, the 'Owner' is listed as 'Nagaradona Harshitha'. At the bottom of the form are three buttons: 'Cancel', 'Save & New', and 'Save'. Below the form, there is a section for 'Created By' and 'Last Modified By', both showing 'Nagaradona Harshitha' with timestamps. The background shows the 'Lease Management' app interface with a search bar and navigation tabs for 'property', 'Payment', 'lease', and 'Tenants'. The 'Tenants' tab is selected. Below the form, there is a message: 'Nothing to see here. There's nothing in your list yet. Try adding a new record.'
